

Micro Greens from Robinette Farms

Micro Greens are grown in our greenhouse south of Lincoln, and are harvested when their first true leaves appear, usually within 14 days of planting. Used in ways meant to tempt the eye as well as the palate, Micro Greens and Shoots can be a garnish, added to salads, sandwiches, soups, in spring rolls, and in countless other ways. In addition to the beauty, flavor and texture that they add to a dish, several studies have shown that they contain considerably higher concentrations of vitamins and carotenoids than their mature plant counterparts. Our Micro Greens and Shoots will do great in your local, organic or specialty foods sections!

Varieties

Packaged for retail sale, we currently offer our Mild Mix, Pea Shoots, Spicy Mix, and Sunflower Shoots. More varieties are available in bulk packaging for restaurant, deli and kitchen use.

Mild Mix – Mild flavored brassicas, which contains Mizuna, Cabbage, Kale, and Kohlrabi. Mostly green with a touch of red.

Pea Shoots – Dark green leaves with a mild, sweet pea flavor. Harvested at 3-4 inches.

Spicy Mix – A colorful blend of red and green mustards with various textures. Mustards bring a kick of wasabi-like heat!

Sunflower Shoots – Light green leaves and stems with a crisp crunch and a mild, nutty flavor.

Packaging

Each labeled, UPC coded, tamper-evident clamshell contains 2 oz. of Micro Greens or Shoots. Clamshell sizes vary based on variety, but are generally containers rated for 20 – 32 oz. (roughly 7" x 5" x 2"). Sold by the case at 8 clamshells per case. We prefer sales by whole cases of each variety, but we also offer Split Cases that include either 4ct Mild Mix/4ct Spicy Mix, or 4ct Pea Shoots/4ct Sunflower Shoots. Split cases include an additional charge.

Shelf Life

These super fresh and robust greens have an expected shelf life of approximately 10 days, although pea shoots can last *much* longer. Each label includes a "Best Before" date that will help you manage stock and guarantee fresh product for your customers.

Organic Certification

We've *never* used chemicals for producing the food we sell, but **our Micro Greens and Shoots are now officially Certified Organic!** We are confident that the labeling change will help move this unique, local and Certified Organic product.

Sampling Demos

We would love to come to your store and help introduce your customers to these unique crops. If you would like to host an in-store sampling demo, please contact us or Erin Schoenberg for more information. We can also provide laminated cards with a photo and farm information to draw your customers in. Please let us know if there are other things we can do to help move these products!

Ordering and Pricing

Available only through Erin Schoenberg at Lone Tree Foods -- 402-822-0066, or sales@lonetreefoods.com.

Thanks and we look forward to working with you!
